TG RENEWABLE ENERGY TECHNOLOGIES NAMES PATRICK C. BRUNETT AS PRESIDENT

Lansing, MI – North America-based TG Renewable Energy Technologies (a division of the Tora Group) today announced the appointment of Patrick C. Brunett as company president.

“Patrick Brunett is a focused and driven business development executive with a demonstrated ability for establishing markets for advanced and emerging technologies,” Tora Group President Rich Achtenberg said. “Through his strong network of highly relevant local and international business contacts, he will create and execute strategic plans to advance TG Renewable Energy’s product portfolio in the solar array and utility wind power components business and to provide technological solutions to all of our customers in the renewable energy industry.”

TG Renewable Energy Technologies supplies quality components and systems for the renewable energy industry. It has a complete product portfolio to service the renewable energy industries, focusing in the areas of wind power generation (wind power generation mechanical components, large wind power (utility) electrical converters, small wind power electrical converters) and solar power (solar power mechanical components – grid, solar power mechanical components – stand alone, solar power electrical inverter – grid, solar power electrical inverter – stand alone).

Patrick Brunett has over 23 years of professional experience, with the last 15 years in automotive business development. Most recently, he served as the vice president of automotive business development for Intelligent Mechatronic Systems in Waterloo, ON, where he was responsible for developing and executing strategic plans to introduce IMS and its portfolio of technologies to the automotive market. Previously, Patrick was a key member of the executive team that launched Sirius Satellite Radio in both the consumer and automotive markets.
